

# DECALS/STICKER INFO SHEET

---

When submitting your artwork for Decals/Stickers all artwork **MUST** be scaled and setup to actual print size and ready to be printed.

Artwork is requested to be saved as EPS or AI if possible so you are able to save your cut lines within the art file.

All artwork should have a Stroke/Outline placed on the artwork that will represent the decal's cut line. This stroke/outline should be placed as the top most element and in its own layer within the art file.
